

# International Research Journal of Ayurveda & Yoga

An International Peer Reviewed Journal for Ayurveda & Yoga

SJIF Impact Factor : 5.69

ISRA Impact Factor : 1.318

ISSN:2581-785X

## **Publication Ethics**

### **1. Publisher's Responsibilities**

We follow the Committee on Publication Ethics (COPE)'s, DOAJ, WAME, and OASPA Code of Conduct for Journal Publishers. The publisher is dedicated to supporting the vast efforts of the editors, the academic contributions of authors, and the respected volunteer work undertaken by reviewers. The publisher is also responsible for ensuring that the publication system works smoothly, and that ethical guidelines are applied to assist the editor, author, and reviewer in performing their ethical duties.

### **2. Editor's Responsibilities**

We follow the Committee on Publication Ethics (COPE)'s Code of Conduct and Best Practice Guidelines for Journal Editors. In addition, some key points are listed below.

- ✂ The editor should acknowledge receipt of submitted manuscripts within two working days of receipt and ensure an efficient, fair, and timely review process.
- ✂ The editor should ensure that submitted manuscripts are processed in a confidential manner, and that no content of the manuscripts will be disclosed to anyone other than the corresponding author, reviewers, and the publisher, as appropriate.
- ✂ The editor should recuse himself or herself from processing manuscripts if he or she has any conflict of interest with any of the authors or institutions related to the manuscripts.
- ✂ The editor should not disclose the names and other details of the reviewers to a third party without the permission of the reviewers.

- ✂ The editor has the right to make the final decision on whether to accept or reject a manuscript with reference to the significance, originality, and clarity of the manuscript and its relevance to the journal.
- ✂ The editor should by no means make any effort to oblige the authors to cite his or her journal either as an implied or explicit condition of accepting their manuscripts for publication.
- ✂ The editor should not use for his or her own research any part of any data or work reported in submitted and as yet unpublished articles.
- ✂ The editor should respond promptly and take reasonable measures when an ethical complaint occurs concerning a submitted manuscript or a published paper, and the editor should immediately contact and consult with the author. In this case, a written formal retraction or correction may also be required.

### **3. Reviewer's Responsibilities**

We follow the Committee on Publication Ethics (COPE)'s COPE Ethical Guidelines for Peer Reviewers. In addition, some key points are listed below.

- ✂ The reviewer who feels unqualified to review the assigned manuscript or affirms that he or she cannot meet the deadline for completion of the review should immediately notify the editor and excuse himself or herself from the process of reviewing this manuscript.
- ✂ The reviewer should inform the editor and recuse himself or herself from reviewing the manuscript if there is a conflict of interest. Specifically, the reviewer should recuse himself or herself from reviewing any manuscript authored or coauthored by a person with whom the reviewer has an obvious personal or academic relationship, if the relationship could introduce bias or the reasonable perception of bias.
- ✂ The reviewer should treat the manuscript in a confidential manner. The manuscript should not be disclosed to or discussed with others except as authorized by the editor.
- ✂ The reviewer should approach the peer-review job objectively. Personal criticism of the author is unacceptable.
- ✂ The reviewer should not use for his or her own research any part of any data or work reported in submitted and as yet unpublished articles.
- ✂ The reviewer should immediately notify the editor of any similarities between the manuscript under review and another paper either published or under consideration by another journal. The reviewer should immediately call to the editor's attention a manuscript containing plagiarized material or falsified data.

## **4. Author's Responsibilities**

The author should not submit concurrent manuscripts (or manuscripts essentially describing the same subject matter) to multiple journals. Likewise, an author should not submit any paper previously published anywhere to the journals for consideration. The publication of articles on specific subject matter, such as clinical guidelines and translations, in more than one journal is acceptable if certain conditions are met. The author should present a precise and brief report of his or her research and an impartial description of its significance.

- ✂ The author should honestly gather and interpret his or her research data. Publishers, editors, reviewers, and readers are entitled to request the author to provide the raw data for his or her research for convenience of editorial review and public access. If practicable, the author should retain such data for any possible use after publication.
- ✂ The author should guarantee that the works he or she has submitted are original. If the author has used work and/or words by others, appropriate citations are required. Plagiarism in all its forms constitutes unethical publishing behavior and is unacceptable.
- ✂ The author should indicate explicitly all sources that have supported the research and also declare any conflict(s) of interest.
- ✂ The author should give due acknowledgement to all of those who have made contributions to the research. Those who have contributed significantly to the research should be listed as coauthors. The author should ensure that all coauthors have affirmed the final version of the paper and have agreed on its final publication.
- ✂ The author should promptly inform the journal editor of any obvious error(s) in his or her published paper and cooperate earnestly with the editor in retraction or correction of the paper. If the editor is notified by any party other than the author that the published paper contains an obvious error, the author should write a retraction or make the correction based on the medium of publication

**Originality and Plagiarism :** The authors should ensure that they have written entirely original works, and if the authors have used the work and/or words of others that this has been appropriately cited or quoted.

**Multiple, Redundant or Concurrent Publication :** An author should not in general publish manuscripts describing essentially the same research in more than one journal or primary publication. Submitting the same manuscript to more than one journal concurrently constitutes unethical publishing behaviour and is unacceptable.

**Acknowledgement of Sources :** Proper acknowledgment of the work of others must always be given. Authors should cite publications that have been influential in determining the nature of the reported work.

**Authorship of the Paper :** Authorship should be limited to those who have made a significant contribution to the conception, design, execution, or interpretation of the reported study. All those who have made significant contributions should be listed as co-authors. Where there are others who have participated in certain substantive aspects of the research project, they should be acknowledged or listed as contributors. The corresponding author should ensure that all appropriate co-authors and no inappropriate co-authors are included on the paper, and that all co-authors have seen and approved the final version of the paper and have agreed to its submission for publication.

**Hazards and Human or Animal Subjects :** If the work involves chemicals, procedures or equipment that have any unusual hazards inherent in their use, the author must clearly identify these in the manuscript. If author involve human or animal in the study, he must submit ethical committee permission details to the editor along with manuscript.

**Disclosure and Conflicts of Interest :** All authors should disclose in their manuscript any financial or other substantive conflict of interest that might be construed to influence the results or interpretation of their manuscript. All sources of financial support for the project should be disclosed.

**Fundamental errors in published works :** When an author discovers a significant error or inaccuracy in his/her own published work, it is the authors obligation to promptly notify the journal editor or publisher and cooperate with the editor to retract or correct the paper.
